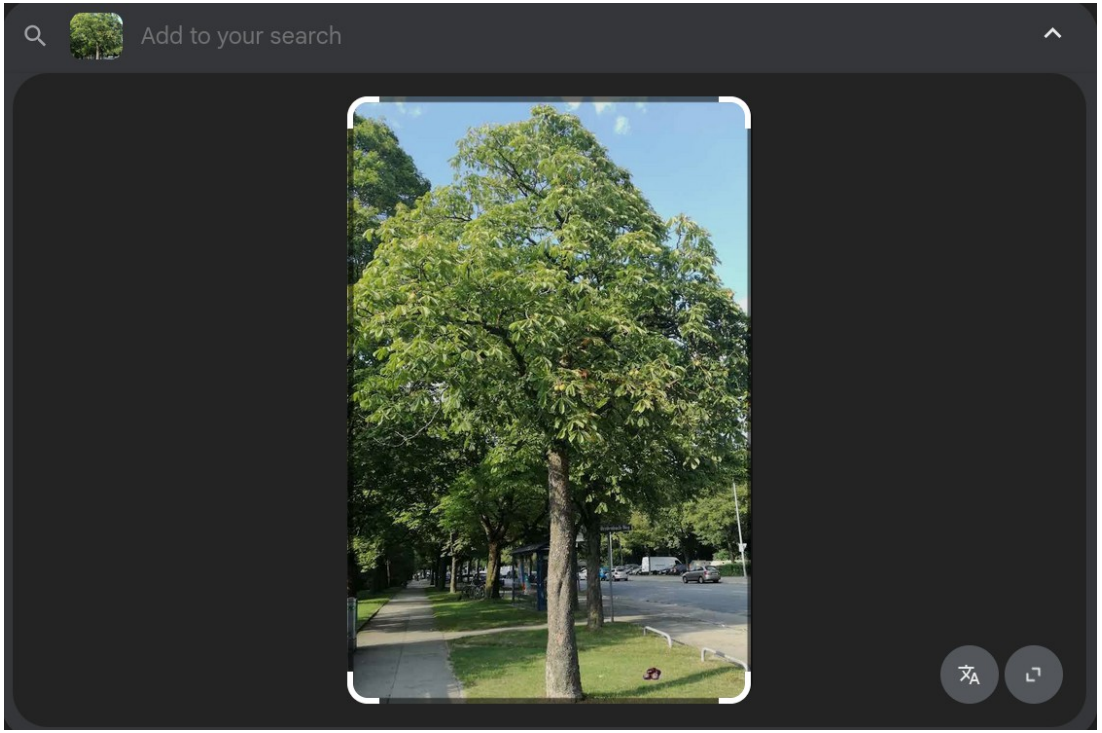
Hack The Web – Tree

In this challenge, we're told to identify a tree species

HTW – Tree
Reverse Image Search



If we don't know much about trees, the easiest way to identify this tree is by using reverse image search

Reverse Image Search

The image features a [redacted] tree, a large deciduous species commonly planted in city parks and residential areas.

- **Scientific Name:** *Aesculus hippocastanum.*
- **Features:** Produces showy white flower clusters in May and large nuts known as horse chestnuts or conkers.

We get the answer, and a few facts about the tree. If we wanted to confirm, we could look for more pictures of this tree to compare with
