

OLlcyber – Headache

Headache

The flag is here... but not right here

This challenge instructs us to go to a specific website and see what it answers

OLlcyber – Headache

Headache

The flag is here... but not right here

Unfortunately, we can't find a flag here, but the title of the challenge is a big clue...

Headache – HTTP Methods

HTTP Methods

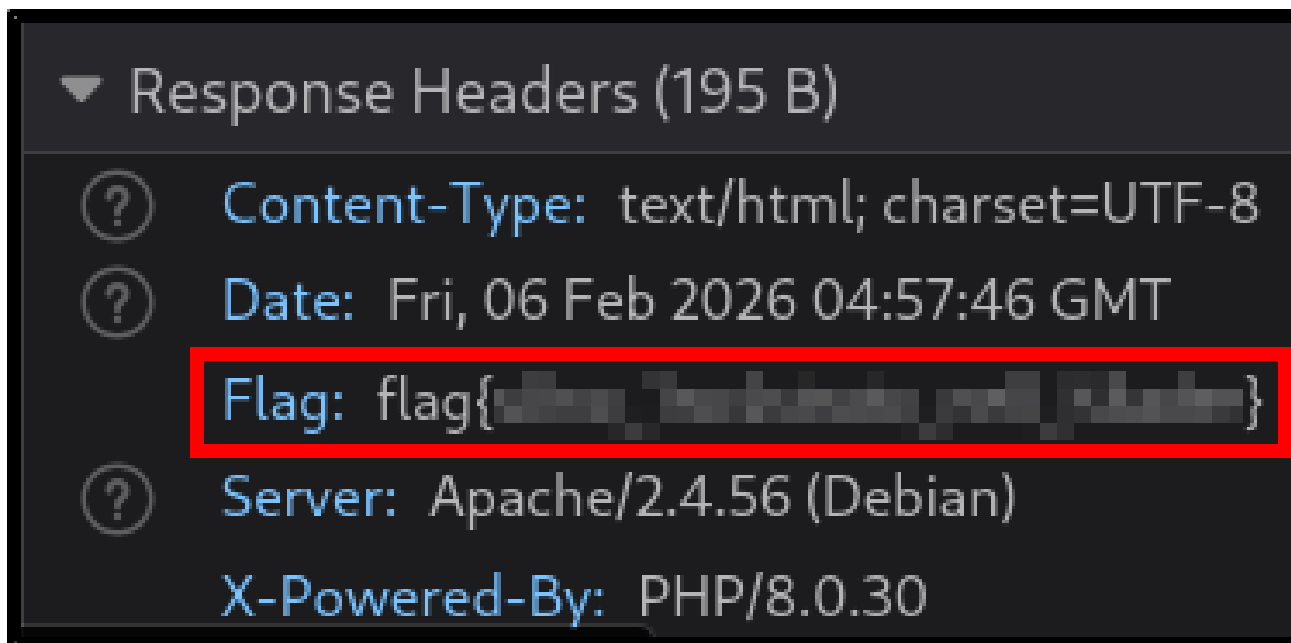

GET – Retrieve webpage contents

POST – Send data to a webpage

HEAD – Retrieve a webpage's response headers

Whenever we make a request to a webpage with any device, e.g., our web browser, we have to use a specific HTTP method (also called a verb)

Headache – HTTP Methods

Keep in mind that, by default, we are unable to specify which HTTP method to use when we use our web browsers unless we use the dev tools

Headache – HTTP Methods

```
└─$ curl --head http://headache.challs.oolicyber.it/  
HTTP/1.1 200 OK  
Content-Type: text/html; charset=UTF-8  
Date: Fri, 06 Feb 2026 04:53:32 GMT  
Flag: flag{some_incorrect_header}  
Server: Apache/2.4.56 (Debian)  
X-Powered-By: PHP/8.0.30
```

Depending on the method used in the request, we can receive different responses from the webserver
