# PicoCTF 2022 – Search Source

In this challenge, we're told that there's an "artifact" in the website source

Mirroring a Website with Wget

```
wget -mpEk http://saturn.picoctf.net:55514
```

```
└$ cd saturn.picoctf.net:55514

┌──(theshyhat☻hackerfrogs)-[/tmp/saturn.picoctf.net:55514]
└$ ls
css  images  index.html  js
```

We could look through the webpages manually,
but it's much easier to download a copy of the
website using the Wget program

Searching Website Content /w Grep

```
└─$ grep -r . -e "picoCTF{"
./css/style.css:/** banner_main picoCTF{1n5p3ct10n_
```

Once we have a local copy of the website, we can use Grep to look for the challenge flag across every webpage on the site
