

Hack The Web – Unicorn

The [Unicorn of Mathematics](#) is a similar project to Hack The Web, just for mathematics. The main characters are a pair of unicorn siblings.

Visit the website. Your answer is the name of the little brother. Please use a translator if you are not fluent in German.

In this challenge, we're asked to do some internet research

HTW – Unicorn OSINT

Visit the website. Your answer is the name of the little brother. Please use a translator if you are not fluent in German.

Discovering information through public resources is known as OSINT (Open Source Intelligence), and we're asked to discover the name of the little brother unicorn character on this website

HTW – Unicorn OSINT

Hello **test** ! Nice that you are here :)

And has someone already told you that you have wonderful 'eyes'? Love them.

My name is Tina and I am a unicorn lady. Okay, I'm only 13 years old, but I already feel really grown up. Unlike my cute brother Teo, he is only 7 years old.

Life is not easy as a unicorn in our society. There are not many of us and we are sometimes looked at

But that is not what it should be done here. I like to think out small math puzzles. I hope you enjoy it as much as you do!

The first puzzle: How many letters does your name have?

We can solve this challenge in a few different ways, and one method involves visiting the website, then translating it

HTW – Unicorn OSINT

🔍 What is the name of the little brother unicorn on this website? <https://einhorn.arrrg.de/>

The little brother unicorn on the website is named **Teo**.  Serlo – Die freie Lernplatt...

He stars alongside his 13-year-old sister, Tina, in a series of math-themed adventure puzzles.  Serlo – Die freie Lernplatt...

A second method of solving this challenge would be to point an LLM chatbot at the website and ask it to find the answer for you
