Can you find the flag in this disk image? This time I deleted the file! Let see you get it now!

Download the disk image [here](#) ↗.

In this challenge, they want us to find a flag in the disk image, but the flag file was deleted

PicoCTF 2026 – DISKO 4

Recovering Deleted Files

```
$ fls -r -p disko-4.dd | grep -e '*'  
r/r * 522629: log/messages  
r/r * 532021: log/dont-delete.gz
```

We can use The Sleuth Kit `fls` command to locate deleted files in the disk image

PicoCTF 2026 – DISKO 4

Recovering Deleted Files

```
└─$ fls -r -p disko-4.dd | grep -e '*'  
r/r * 522629:    log/messages  
r/r * 532021:    log/dont-delete.gz
```

With `fls`, typically, deleted files will have an asterisk beside the inode number, so there are two deleted files

PicoCTF 2026 – DISKO 4

Recovering Deleted Files

```
icat disko-4.dd 532021 > dont-delete.gz
```

The file we're looking for is the `dont-delete.gz` file, and we can recover it using the `icat` command

PicoCTF 2026 – DISKO 4

Recovering Deleted Files

```
└─$ cat dont-delete  
Here is your flag  
picoCTF{d91_d0n7_k1d3_w3ll_c0ns1d3r}
```

After decompressing the file, we can read the file
to obtain the flag
