

Hack The Web – Flipped

Vertical. Come on, grab a mirror — then you can read the text better.
If you can read this text, then you've already solved the challenge. Because the answer is

In this challenge, we're presented with flipped text

Hack The Web – Flipped Text Formatting

```
<style>
  body {
    -moz-transform: scale(-1, 1);
    -webkit-transform: scale(-1, 1);
    -o-transform: scale(-1, 1);
    -ms-transform: scale(-1, 1);
    transform: scale(-1, 1);
  }
</style>
```

If we look at the web page's source code, we can see that the page text was flipped because of the HTTP style tags

Hack The Web – Flipped Text Formatting

```
<style>
  body {
    -moz-transform: scale(-1, 1);
    -webkit-transform: scale(-1, 1);
    -o-transform: scale(-1, 1);
    -ms-transform: scale(-1, 1);
    transform: scale(-1, 1);
  }
</style>
```

If we look at the web page's source code, we can see that the page text was flipped because of the HTTP style tags

Hack The Web – Flipped Text Formatting

```
<p>If you can read this text, then you've already solved the challenge.  
Because the answer is Vertical. Come on, grab a mirror – then you can read the  
text better.</p>
```

But the web page's text is not flipped in the source code, so we can obtain the answer that way
