

Hack The Web – Birthday

I so often look at my life and think to myself: What's the point of it all? I hope there will be a day when I can put the pieces together and understand the meaning.

With this task, you have it easier. Place the six parts on top of each other with your mouse or finger to get your answer.

In this challenge, we're told to look at the server's source code, and, in a specific file, locate the name of a person whose birthday is June 23rd

Hack The Web – Birthday Source Code Analysis

Name	Last commit message	Last commit date
..		
birthday.ejs	finish up Geburtstag experiment	4 months ago
booyah.ejs	Update 007	5 months ago
cheater.ejs	infrastructure for difficulty selection	4 months ago

The link in this challenge brings us to the Hack the Web Github repository, and we're instructed to look at the `birthday.ejs` file
