

Hack The Web – Paper

There are lots of ways to hide messages. Hardly anyone prints websites these days — and that's exactly an opportunity to hide a secret message in the print preview.

You can find your answer in this page's print preview.

In this challenge, we're told to look at this
webpage's print preview

Hack The Web – Paper

The Print-Only CSS Class

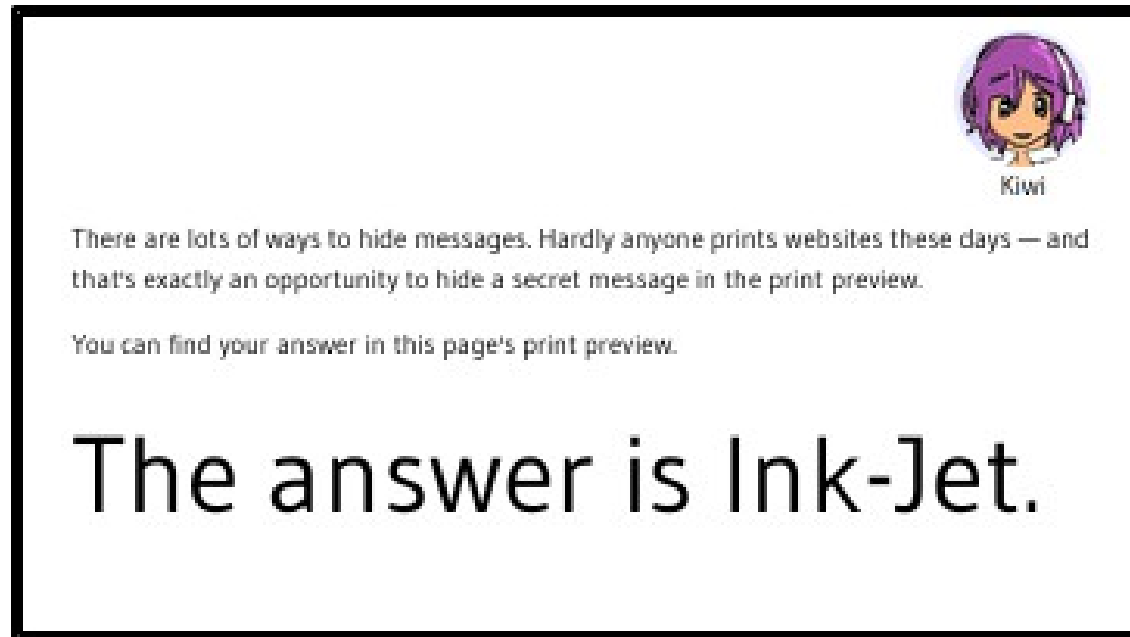

```
<p class="print-only">The answer is Ink-Jet.</p>
```

```
<style>  
  .print-only {  
    display: none;  
  }
```

On webpages, you are able to specify content that only shows up when the document is printed

Hack The Web – Paper

The Print-Only CSS Class

We can confirm this by attempting to print the page
