I have built my own Git server with my own rules!

You can clone the challenge repo using the command below.

```
git clone ssh://git@foggy-cliff.picoctf.net:63305/git/challenge.git
```

Here's the password: e38a0906

Check the README to get your flag!

In this challenge, we're asked to investigate a Git repository to read the flag

PicoCTF 2026 – MY GIT

Git Repository Enumeration

Git is a distributed version control system that tracks versions of files. It is used by programmers to help develop software collaboratively

PicoCTF 2026 – MY GIT

Git Repository Enumeration

git clone

ssh://git@foggy-cliff.picoctf.net:66666/git/challenge/git

The first step to solving this challenge is to clone the repository into a writable directory

PicoCTF 2026 – MY GIT

Git Repository Enumeration

```
# MyGit

### If you want the flag, make sure to push the flag!

Only flag.txt pushed by ``root:root@picocft`` will be updated with the flag.

GOOD LUCK!
```

The challenge description asks us to read the README file to get the flag, and we see the message above

PicoCTF 2026 – MY GIT

Pushing a Git Commit

```
# MyGit

### If you want the flag, make sure to push the flag!

Only flag.txt pushed by ``root:root@picoctf`` will be updated with the flag.

GOOD LUCK!
```

We're told to push a file to the repository as the root user with the root@picoctf email, and we can complete this in 6 steps

PicoCTF 2026 – MY GIT

Step 1: Create the Flag.txt File

```
echo 'HackerFrogs! Like and subscribe!' > flag.txt
```

Use the echo command to create a file called
flag.txt

PicoCTF 2026 – MY GIT

Step 2: Set Git User Email

```
git config user.email "root@picoctf"
```

Use the Git command to set our email in Git

PicoCTF 2026 – MY GIT

Step 3: Set Git User Name

```
git config user.name "root"
```

Use the Git command to set our username in Git

PicoCTF 2026 – MY GIT

Step 4: Add Flag.txt File to Repo

```
git add flag.txt
```

Use the Git command to add the flag.txt file to the repository

PicoCTF 2026 – MY GIT

Step 5: Confirm Commit /w Message

```
└─$ git commit -a -m "added flag.txt file"  
[master 552b6c8] added flag.txt file  
1 file changed, 1 insertion(+)  
create mode 100644 flag.txt
```

Use the Git command setup the commit with the message that will be attached to the commit

PicoCTF 2026 – MY GIT

Step 6: Push the Commit to the Repo

```
└─$ git push  
git@foggy-cliff.picoctf.net's password:  
Enumerating objects: 4, done.  
Counting objects: 100% (4/4), done.
```

Lastly, use the Git command to push the commit to the repository
