After logging in, you will find multiple file parts in your home directory. These parts need to be combined and extracted to reveal the flag.

SSH to `dolphin-cove.picoctf.net:61635` and login as `ctf-player` with password `6abf4a82`.

In this challenge, we're asked to combine a file in order to extract the flag from it

# PicoCTF 2026 – Piece by Piece

## Reassembling a Multi-Part Zip File

### Hint:

- The flag is split into multiple parts as a zipped file.
- Use Linux commands to combine the parts into one file.
- The zip file is password protected. Use this "supersecret" password
- After unzipping, check the extracted text file for the flag.

After we've logged into the server, we see there are instructions, with the above message

## Reassembling a Multi-Part Zip File

```
cat part_aa part_ab part_ac part_ad part_ae > archive.zip
```

To put a multi-part zip file together, we can use the `cat` command, and output the result to a new zip file

## Reassembling a Multi-Part Zip File

```
ctf-player@pico-chall$ unzip archive.zip
Archive:  archive.zip
[archive.zip] flag.txt password:
extracting: flag.txt
```

Then unzip the file and read the flag
