Hack the Web - Characters

We live in an international world, and hackers operate in many languages. Some languages differ greatly from ours and can be quite a challenge. What tasty treat is hidden behind the following characters?

This challenge wants us to translate characters in a foreign language, in this case, Japanese

Hack the Web – Characters Machine Translation

We live in an international world, and hackers operate in many languages. Some languages differ greatly from ours and can be quite a challenge. What tasty treat is hidden behind the following characters?

Whether this is copyable text or text within an image, we can use machine translation tools to help us

Hack the Web – Characters Machine Translation

And copy the image with the foreign language will result in it being translated into our language of choice
