

Hack The Web – GPS Code

```
52.7073, 8.5031  
48.63253, 12.85515  
50.9761, 8.8677  
53.2724, 12.824  
48.0336, 7.7649  
49.59637, 11.11833  
53.679, 10.6947
```

In this challenge, we're told to lookup GPS coordinates and identify location names

Hack The Web – GPS Code

Global Positioning System

GPS stands for Global Positioning System, and it's a system used to reference geographic locations based on a set of coordinates
