

Hack The Web – Catchy Tune

I've had this catchy tune stuck in my head for a few days. I don't know where it came from, but somehow this song reminds me of my past.

Please look it up and tell me the title of the song. I don't dare to do it myself.

In this challenge, we're asked to identify a piece of music

Hack The Web – Catchy Tune

Media File Metadata

I've had this catchy tune stuck in my head for a few days. I don't know where it came from, but somehow this song reminds me of my past.

Please look it up and tell me the title of the song. I don't dare to do it myself.

There are two ways we could identify the music in this challenge. The first way is to look at the file's metadata

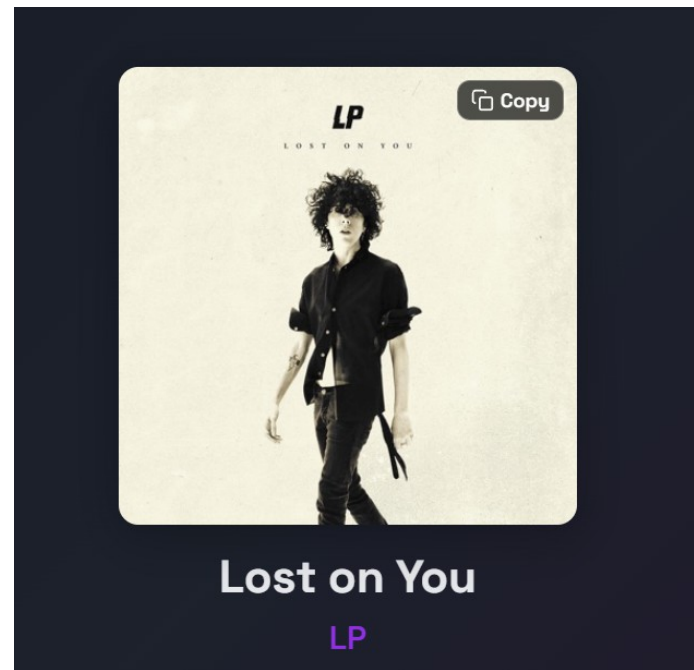

Hack The Web – Catchy Tune

Media File Metadata

```
Artist           : LP  
Album            : Lost on You  
Title            : Lost on You
```

When media files are created, they're almost always created with metadata, which is data about the media file

Hack The Web – Catchy Tune Media File Metadata

If we don't have access to the metadata, we could use an audio reverse search tool, like Songfinder, to identify the song
