

Hack The Web – Pigpen Cipher

Here is your message. You'll definitely notice some similarities: the dots are back, some familiar shapes... This is your answer in the pigpen cipher — decode it!

In this challenge, we're told to decipher a message using the Pigpen Cipher

Hack The Web – Pigpen Cipher

Cryptography – Substitution Cipher

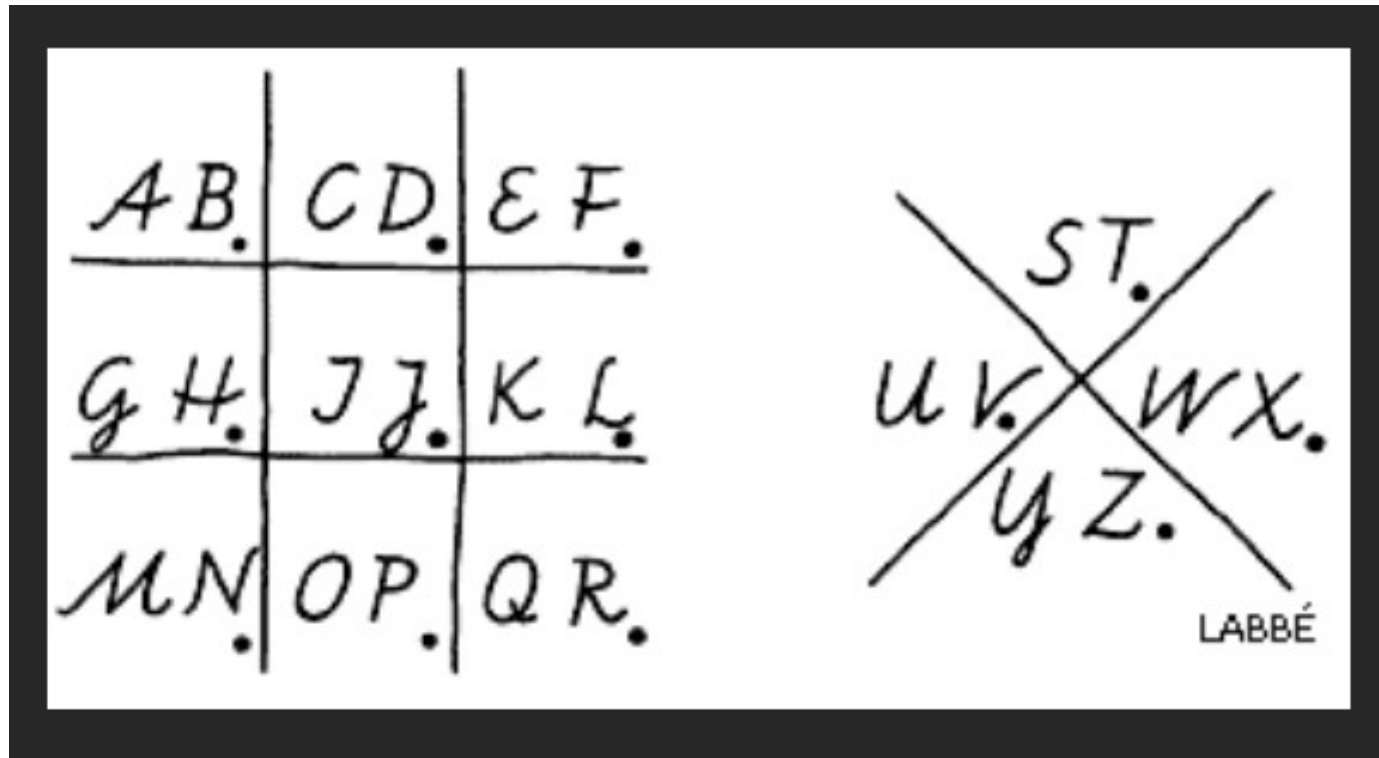

Here is your message. You'll definitely notice some similarities: the dots are back, some familiar shapes... This is your answer in the pigpen cipher — decode it!

The Pigpen Cipher is an example of a substitution cipher, where one symbol stands in for a letter

Hack The Web – Pigpen Cipher

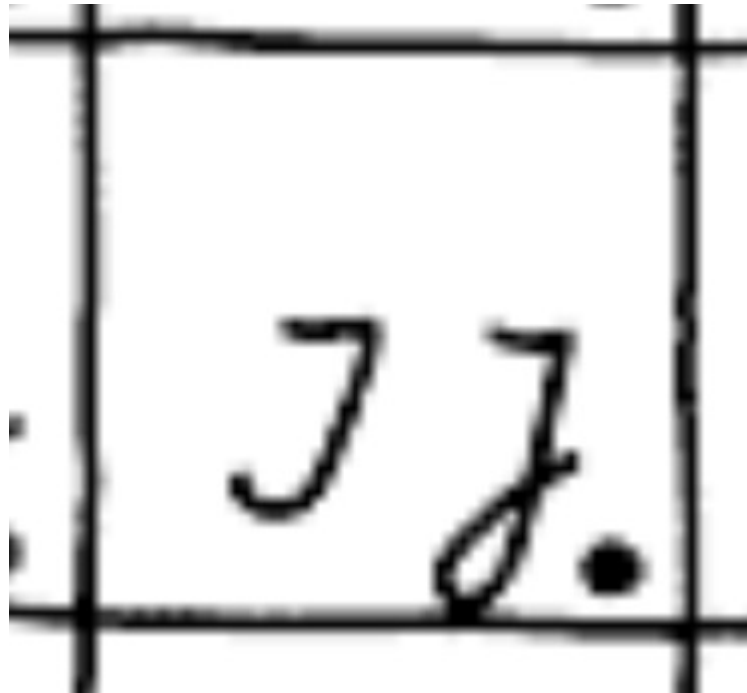

Cryptography – Substitution Cipher

In Pigpen Cipher, a symbol represents one of two possible letters, depending on if there is a dot included in the symbol or not

Hack The Web – Pigpen Cipher

Cryptography – Substitution Cipher

For example, a square symbol represents the letter I if there's no dot, and the letter J if there is a dot
