Hack the Web - Scratch

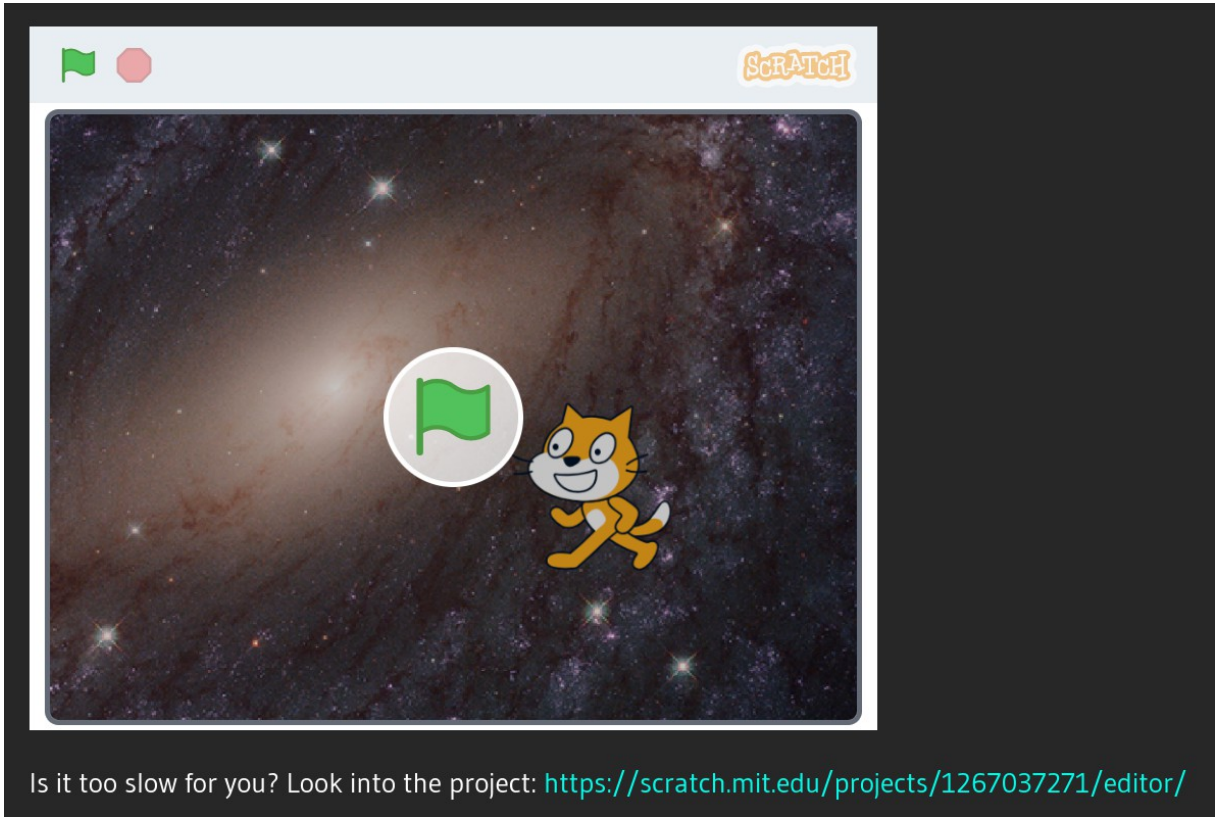

This challenge wants us to play a game written in Scratch, a visual coding language

Hack the Web - Scratch

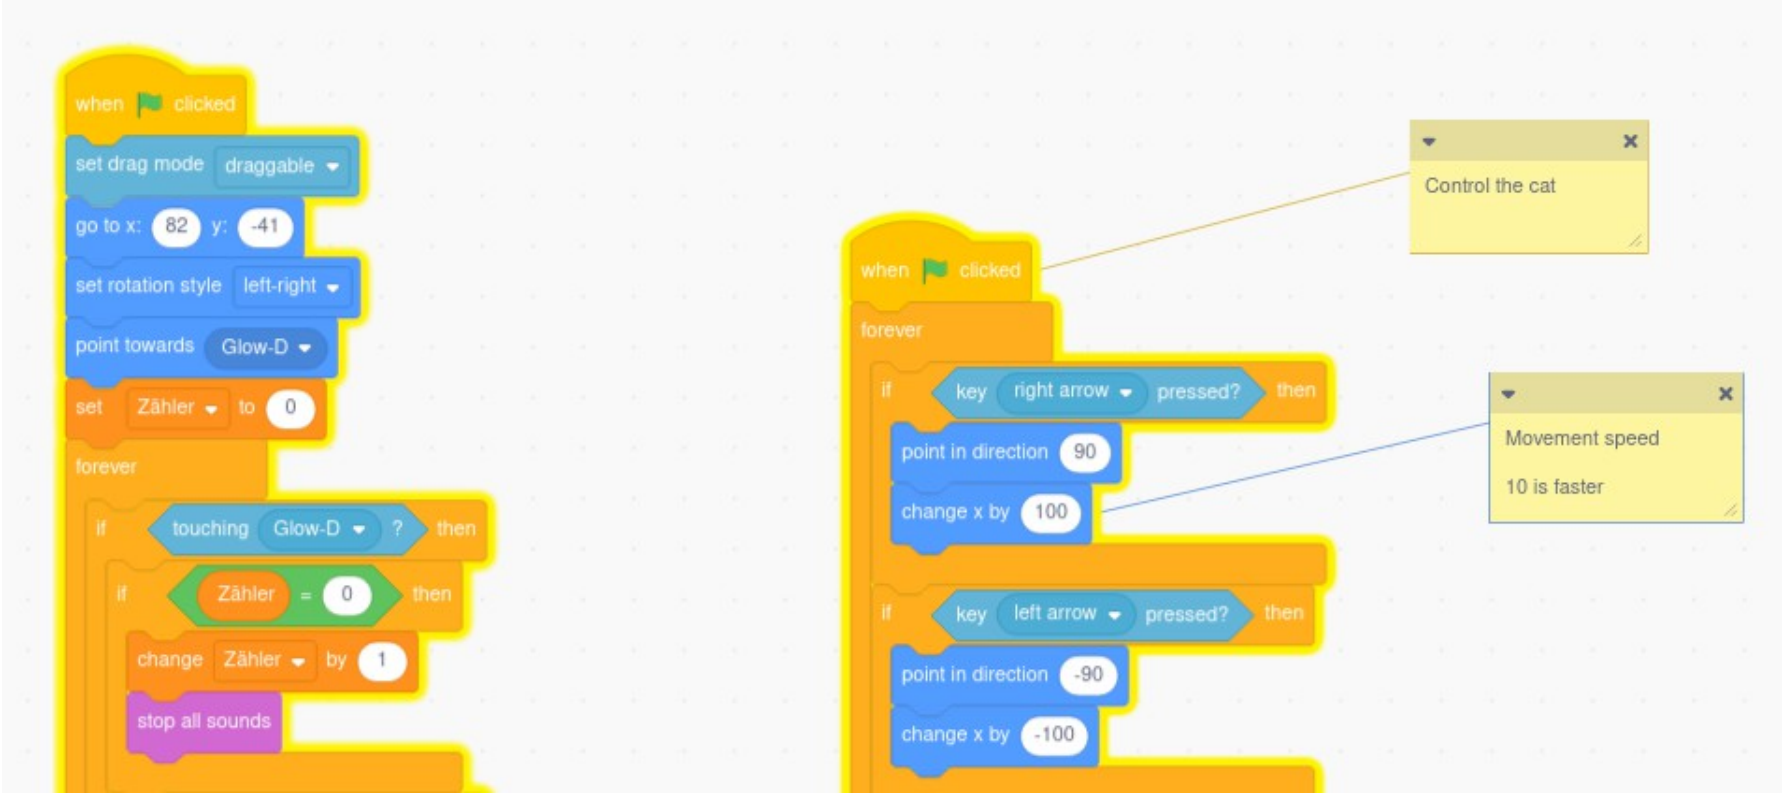

From the gameplay, it seems like we want to touch each of the letters on the screen to spell out the answer for the challenge

Hack the Web - Scratch

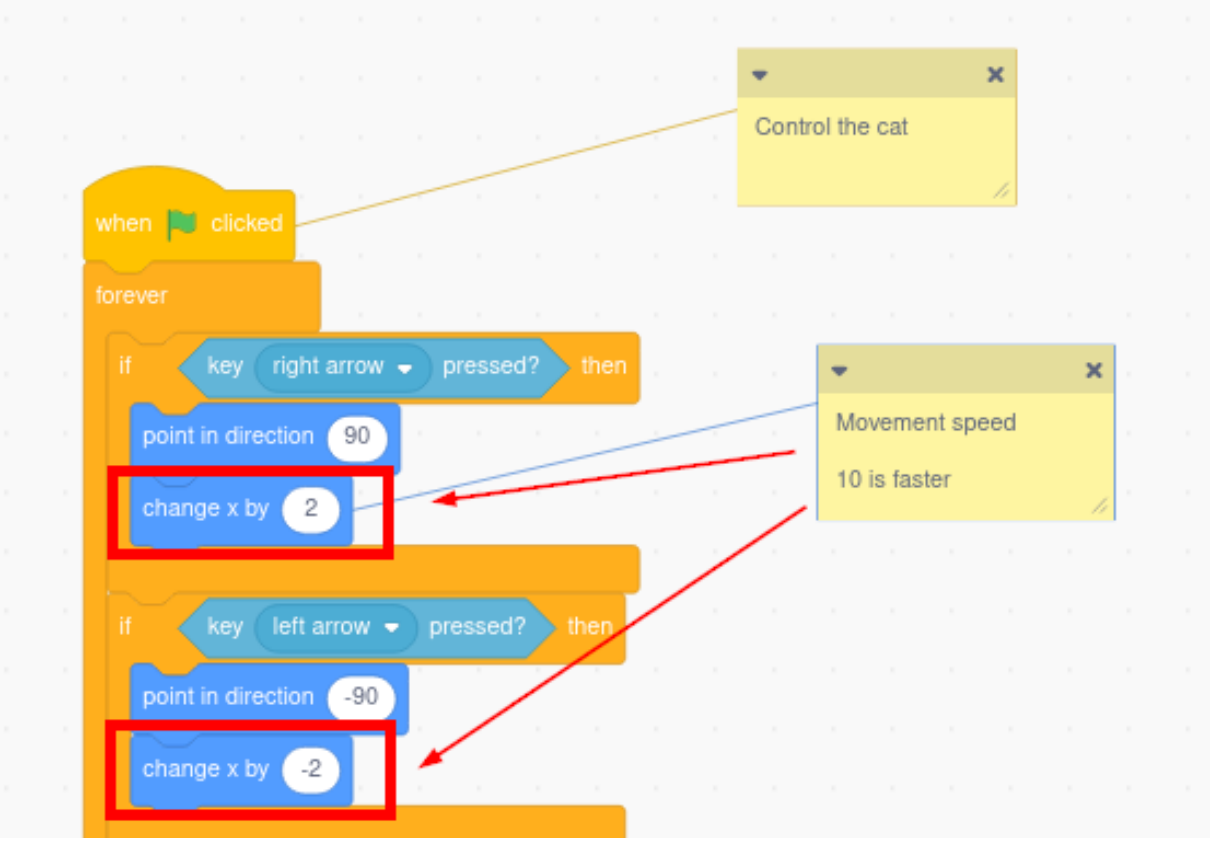

However, our game character moves very slowly, so it would be tedious to play the game as is

Hack the Web - Scratch

The challenge also points us towards an editor for this game, where we can modify it

Hack the Web - Scratch

Specifically, in the control code of the game, we can modify the character speed
