

Hack The Web – ROT13

```
terng lbh unir fhpprffshyy! qrbqrg gur grkg nf  
n erjneq lbh abj trg gur nafjre naq vg vf zveebeonyy
```

In this challenge, we're presented an encrypted
message

Hack The Web – ROT13

Cryptography: Shifted Letter Ciphers

```
terng lbh unir fhpprffshyyl qrpbrq gur grkg nf  
n erjneq lbh abj trg gur nafjre naq vg vf zveebeonyy
```

Cryptography is the study of hidden messages,
and a specific methods for creating secrets
messages are called ciphers

Hack The Web – ROT13

Cryptography: Shifted Letter Ciphers

```
terng lbh unir fhpprrffshyyl qrpbrq gur grkg nf  
n erjneq lbh abj trg gur nafjre naq vg vf zveebeonny
```

We're told that this message was created by shifting letters in the alphabet, and the most common cipher which uses this method is called
ROT13

Hack The Web – ROT13

Cryptography: ROT13 Ciphers

ROT13 Cipher

ABCDEFGHIJKLM

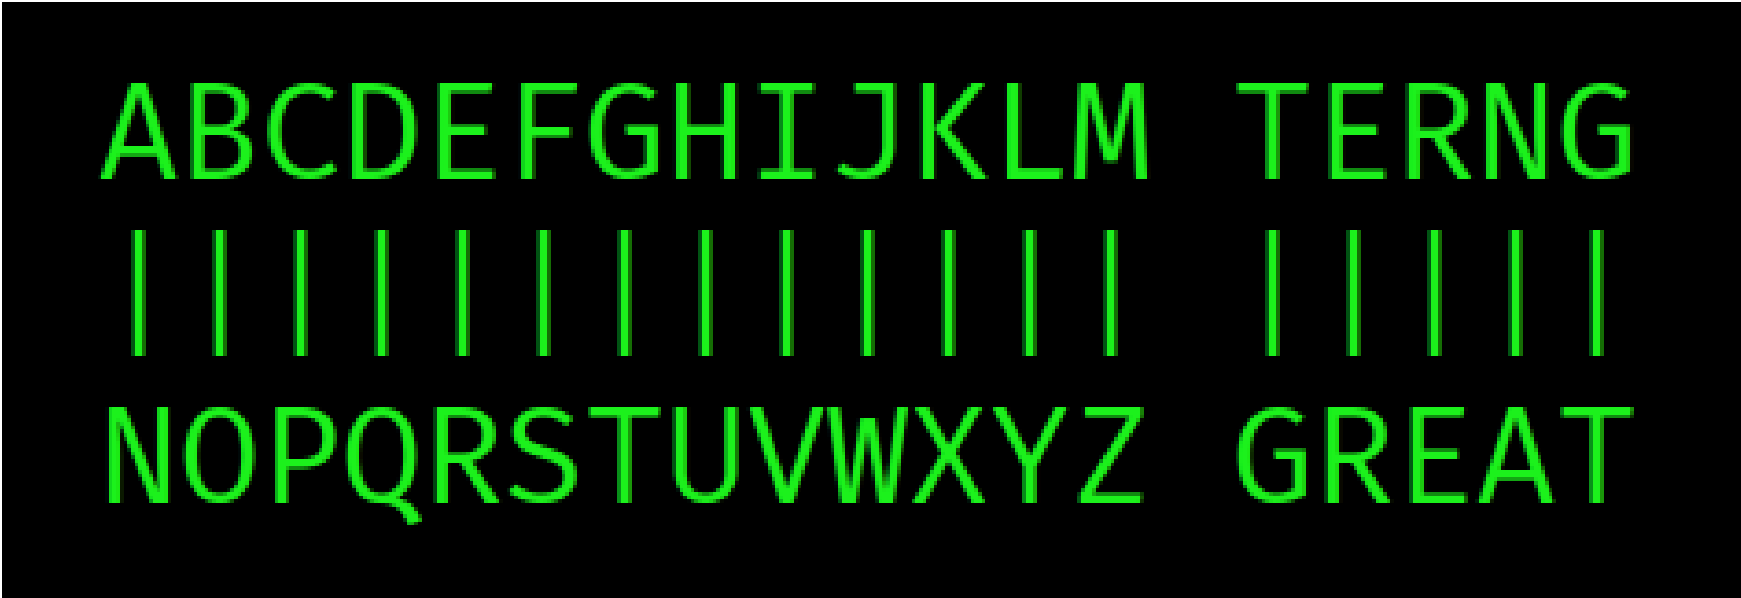

|||||

NOPQRSTUVWXYZ

The cipher is called ROT13 because we rotate each letter by 13 positions in the alphabet to encrypt the message. We do the same operation to decrypt the message

Hack The Web – ROT13

Cryptography: ROT13 Ciphers

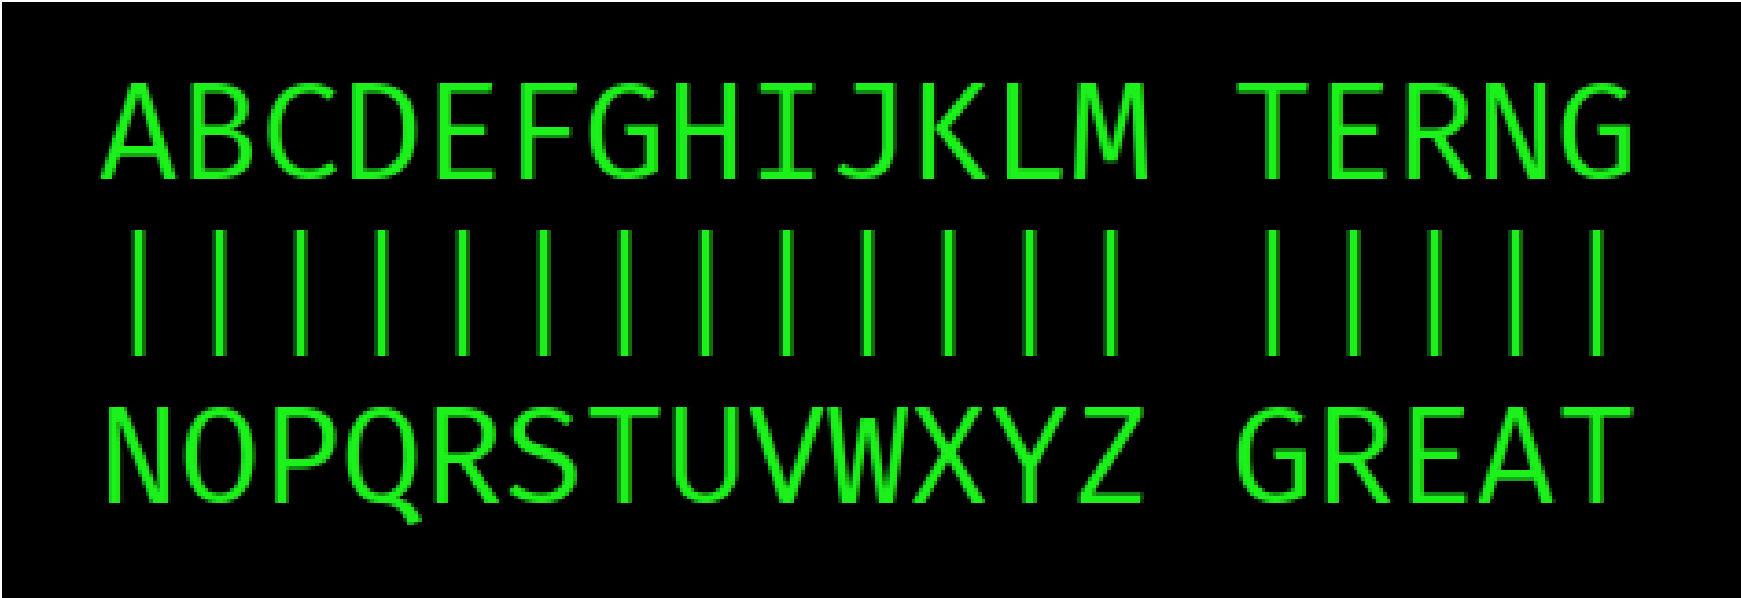

ABCDEFGHIJKLMNOPQRSTUVWXYZ GREAT

So if we wanted to manually decrypt the first word in this message using ROT13, we would get the word GREAT

Hack The Web – ROT13

Cryptography: ROT13 Ciphers

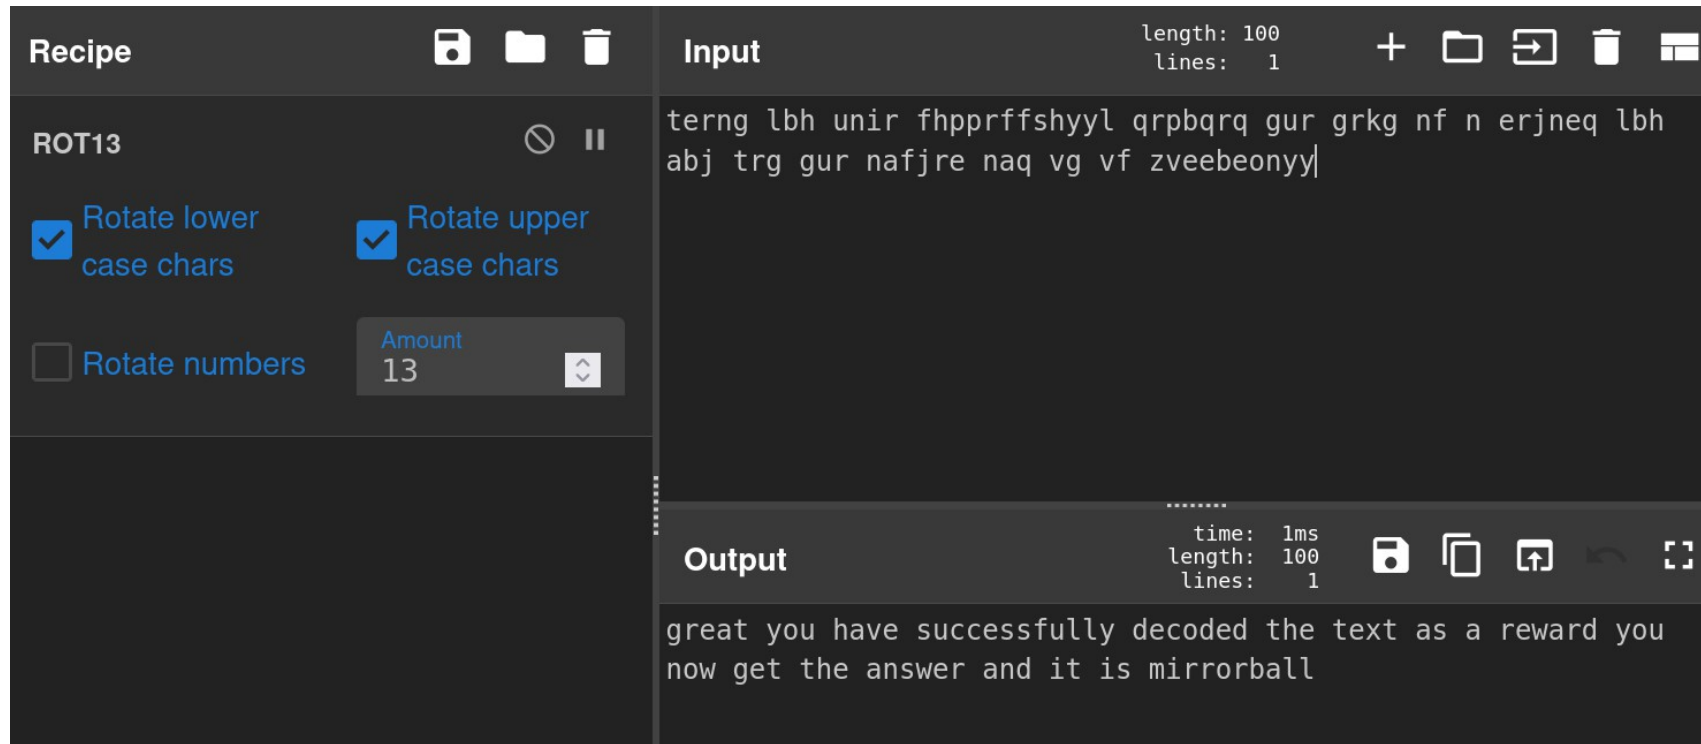

ABCDEFGHIJKLMNOPQRSTUVWXYZ TERNG
| | | | | | | | | | | | | | |
NOPQRSTUVWXYZ GREAT

ROT13 is quite common in cyber security games, and there are many different methods we could use to automatically decrypt ROT13 messages

Hack The Web – ROT13

Cryptography: ROT13 Ciphers

One popular website for decoding messages is the cyberchef.io website
