

Hack The Web – Elements

It might seem like I don't play anything other than Minecraft. But that's not true. I used to spend a lot of time in the world of Teyvat, too.

I'll prove it to you. Here's a secret text. The first letters of the following elements form your answer.

In this challenge, we're asked to decipher a secret message

Hack The Web – Elements

Cryptography: Substitution Cipher

It might seem like I don't play anything other than Minecraft. But that's not true. I used to spend a lot of time in the world of Teyvat, too.

I'll prove it to you. Here's a secret text. The first letters of the following elements form your answer.

The study of secret messages is called cryptography, and the systems for creating secret messages are called ciphers
