Hack The Web – Tedious Work III

In the end, it's up to you how you calculate — in your head, with a computer, or by combining terms cleverly. What matters is the result, and every way to get there makes sense.

Calculate the result of 1 + 2 + 3 + ... + 97 + 98 + 99 + 100.

In this challenge, we're told to do some math,
1 + 2 + 3 + ... + 97 + 98 + 99 + 100

Hack The Web – Tedious Work III
Adding Consecutive Numbers

In the case that we have
to add consecutive numbers,
there is a trick that can make
manual calculation
much quicker

Hack The Web – Tedious Work III
Adding Consecutive Numbers

```
(1 + 100) * (100 / 2) = 5050
```

If we add the first and last numbers in the set, then multiply that number by the number of items in the set divided by two, then we will get the correct answer

Hack The Web – Tedious Work Adding Consecutive Numbers III

```
1 + 2 + 3 + 4 + 5 + 6 + 7 + 8 + 9

(1 + 9) * (8 / 2) + 5 = 45
```

In the case there are an odd number of items in the set of consecutive numbers, we remove the number in the middle, and add it at the end
