Hack The Web – Ports

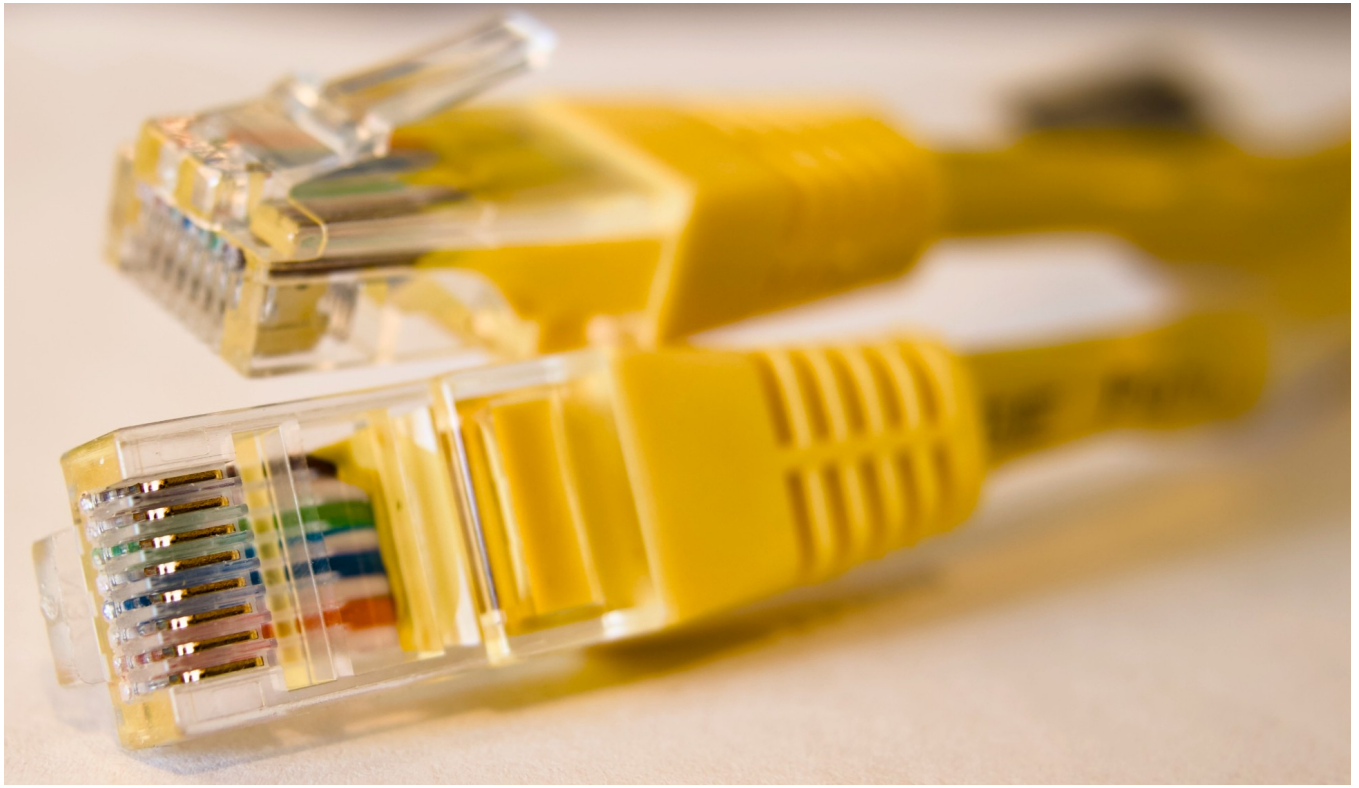

In this challenge, we're asked to put some wires in order using the TIA-568B standard

Hack The Web – Ports

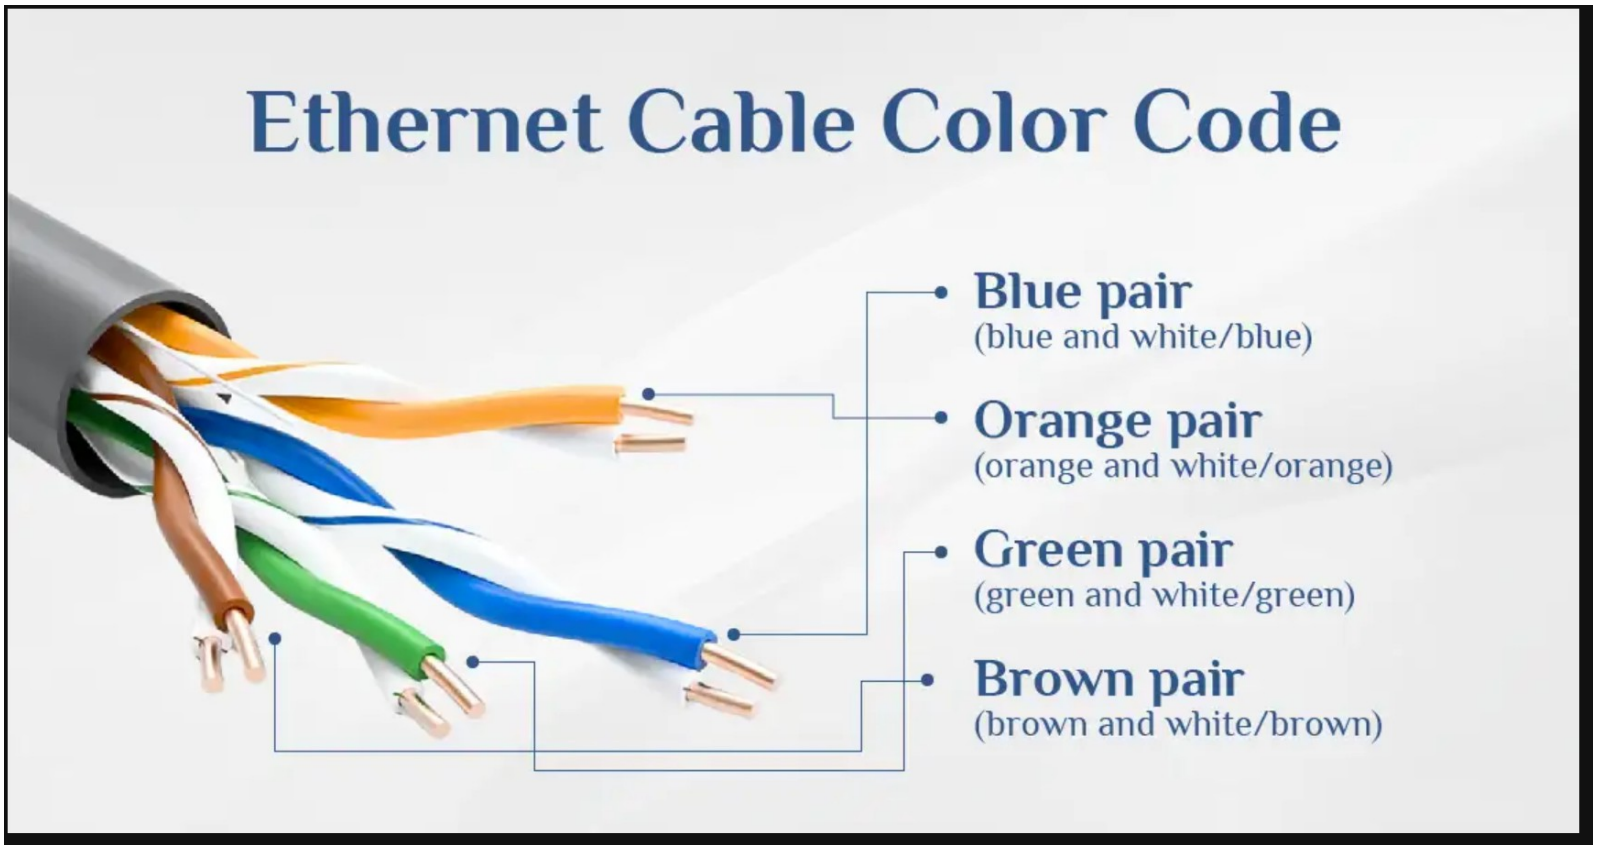

The TIA-568B standard is used for Ethernet cables used in computer networking

Hack The Web – Ports

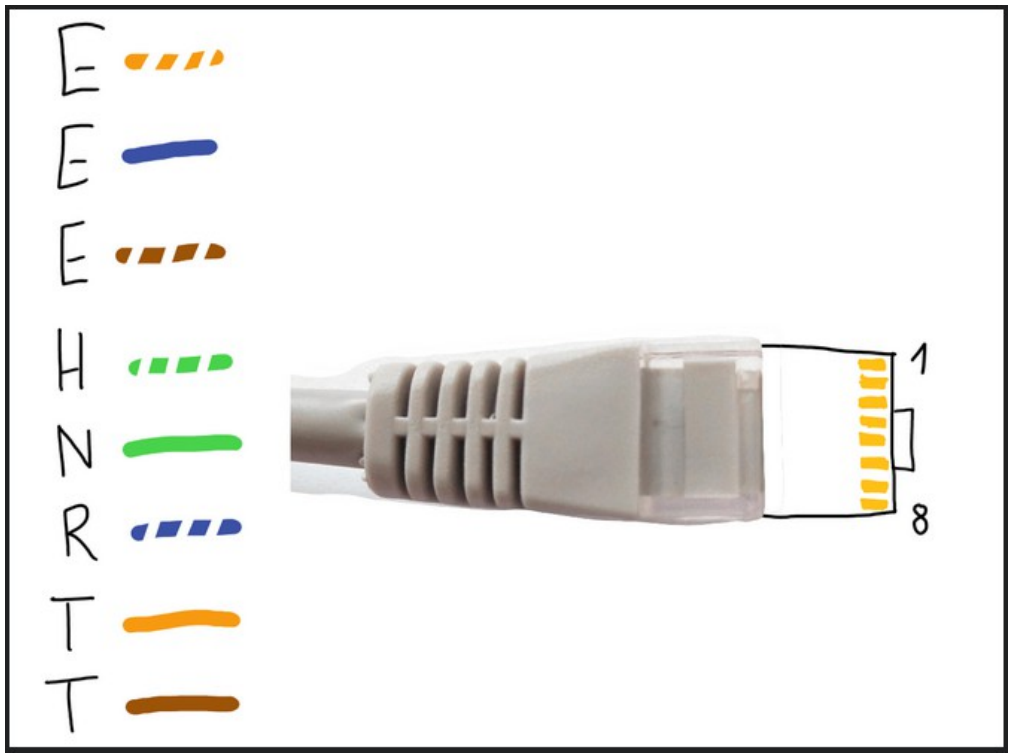

Ethernet cables are commonly used to connect computer devices to networks, e.g., connecting a PC to a router

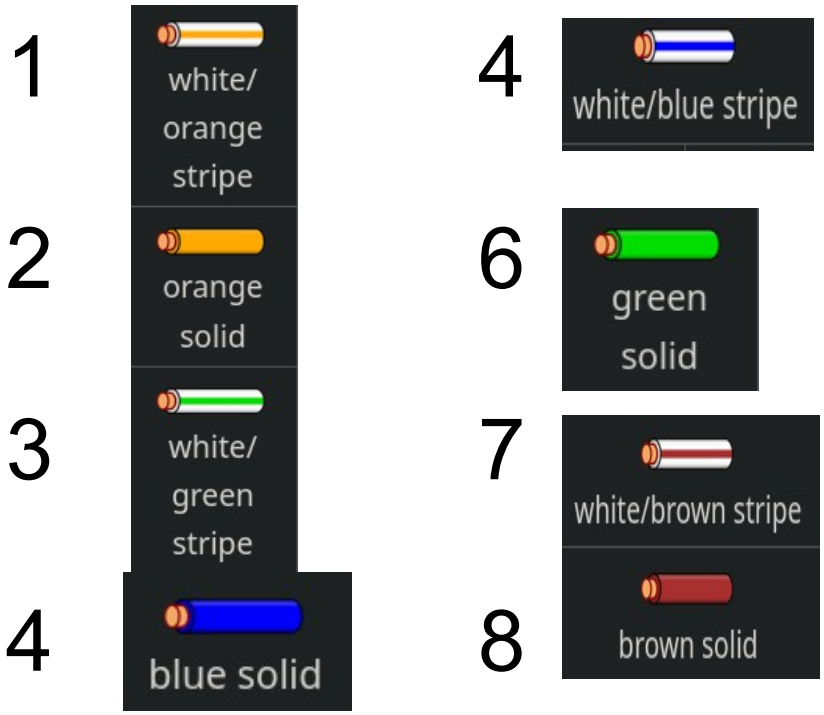

Hack The Web – Ports

The network data signals flow through 4 pairs of twisted wires

Hack The Web – Ports

This challenge wants us to put the colors of the wires into the correct number positions to form an answer out of the letters
